Important!
Always have an adult help you!

What you'll need:
- clay
- string or rope
- bucket of water
- nails or straws

Organize your materials
Add a splash of water to the clay

Roll a small piece of clay between your hands until it forms a small sphere
Carefully push a nail or straw through the center of the sphere
Make sure there is a hole big enough to fit a piece of string through

Let the spheres dry by placing them in the sun or under some form of heat
Once dry, thread the string through six of the spheres
Tie the ends together around your ankles and dance to make sounds!
